AE2 Week-1 Review

Acoustics, Pro Tools Setup, Equal Loudness and SSL 101

1. What is diffusion, and what type of materials are typically used to create a diffusion panel?
2. What are acoustic absorption panels typically made of?
3. What is the proper order for powering up a Pro Tools HD system including the outboard gear and peripherals?
4. What is the Equal Loudness Curve (ELC)?
5. Why is it important to consider what the Equal Loudness Curve means?
6. Who were the two Bell Labs scientists who did the ELC research?
7. What are the 'obstacles to getting sound' out of the SSL?
